

DIN is an abbreviation for Deutsches Institut für Normung e.V. (the German Institute for Standardization), a present-day ISO member body. One of the standards is DIN 43700, the specification for nominal front- and cut-out dimensions of measurement and control instruments for panel mounting. It has now been superseded by DIN IEC 61554. In Europe, the fractional DIN designation is generally not recognized and DIN cases are identified by the outside dimensions of their bezel in millimeters.

Founded in 1976, Texmate designs, manufactures and distributes a wide range of intelligent, high quality, made-in-the-USA, IIoT-ready, UL certified and CE/RoHS compliant panel and DIN rail mount indicators, bargraphs, process controllers, and micro PLCs for over 40 years.

Applications include manufacturing, oil and gas, food processing, agriculture, power/energy, military, medical and environmental measurement and control. See application examples by [clicking here](#).
