

A utility meter, for high resolution single or differential DC voltage measurement, that can be easily scaled to any process engineering units of measure.

General Features

The UM-45 is an economical, high resolution DC voltage measuring meter with three header selectable full scale ranges of 2V, 20V and 200V. A five position Span Adjust header facilitates scaling to almost any process engineering unit of measure.

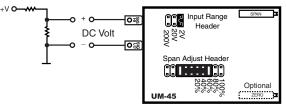

The standard meter has a high efficiency red LED display and user selectable AC power inputs of 100V AC to 120V AC or 200V AC to 240V AC are provided. An Optional 24V AC or an auto sensing isolated AC/DC 24V switching power supply can be ordered.

The standard meter is provided with TB-KIT screw terminal blocks and insulated quick- disconnects. For the greatest convenience and ease of use, order the optional preconfigured Push-On screw terminal connectors. (see Push-On Screw Terminals and Ordering Information)

Typical Application Connections

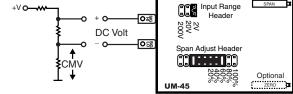

DC Volts Single-ended measurement with

a Resolution of 10 milliVolt.

DC Volts Differential measurement with

Max CMV (common mode voltage) = 50V*

Compatibility

The UM-Series NEMA case style is complementary to Texmate's Classic RP-Series. For economy, each UM model is dedicated to a specific application. UMs are ideal for upgrading or replacing the traditional USA NEMA case panel meters presently in use.

Specifications

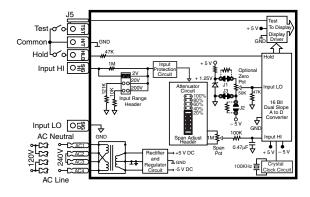

Provision for optional zero pot to offset the reading displayed. (See Ordering Information)	Single-ended, however the isolated power supply enables differential measurements up to a maximum common mode of 50V.* Three built in header selectable ranges of ±2V DC, ± 20V DC & ±200V DC FS
Input Impedance:	1MΩ minimum
A/D Converter:	16 Bit Dual Slope
Accuracy:	± (0.05% of reading + 3 digits)
Temp. Coefficient:	100ppm/° C (Typical)
Warm Up Time:	2 minutes to specified accuracy
Conversion Rate:	3 readings per second
Display:	0.56" high efficiency LED Display Hold and Test Function
Polarity:	Bipolar. Assumed +, displays -
Decimal Selection:	Header under face plate, X•X•X•X•
Overload Indication:	When input exceeds the full scale on any range being used, the meter displays flashing "0000"
(Optn) VO-DC/ISO (Optn) VO-24V	120/240V AC, 50/60 Hz. approx 2.5W. lsolated Switcher 9 to 36V DC/12 to 24V AC lsolated Transformer 24V AC ±10% Non-isolated 5V DC ±10%
Operating Temp.:	–10 to 50°C
Storage Temperature:	–20 to 70 °C.
Relative Humidity:	95% (non-condensing)
Case Dimensions:	Bezel 4.06"Wx1.89"H (102.7Wx47.9Hmm) Depth behind bezel 3.64" (92.22 mm) Plus 0.5 to .9" (12.7 to 22.8mm) depending on connector used.
Weight:	10oz., 13oz. when packed.

UM-Series low cost utility meters for switchboard and process indication

	Header Selectable Sensitivity 2mV/V, 5mV/V, 10mV/V, 20mV/V, 3.5 digit
	UM-35J/KJ or K thermocouple input, 1° resolution, order °C or °F, 3.5 digit
	UM-35RTD 100 Ω platinum RTD, 3 or 4 wire, order °C or °F and 0.1° or 1°, 3.5 digit

Functional Diagram

Connector Pinouts

UM-Series are connectable using the TB-KIT screw terminal blocks provided with the meter. For greatest convenience, order a Texmate Push-On screw terminal connector. Alternatively, a pcb edge connector can be used.(see connector options)

DC input signals and power supply voltages can be hazardous. Do Not connect live wires to screw terminal plugs, and do not insert, remove or handle screw terminal plugs with live wires connected.

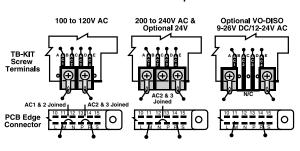

Pins 1 & 2 - Display Test: All numeric display segments will light up when this pin is connected to the H/T Common Pin. When a TB-KIT Screw Terminal is used the Display Test function will operate unless J5 is cut which cancels test and enables the Hold function.

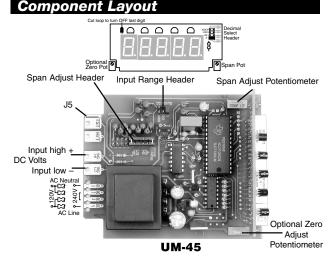

Pins 3, 4, C & D - H/T Common Pin: The Hold and Display Test pins have to be connected to this pin to activate their respective functions. Pins A & B - Hold Reading: When this pin is connected to the H/T Common pin, A/D conversions will continue, but the display will not be updated until Pins A & B are disconnected from the H/T Common pin. When using a Texmate TB-KIT Screw Terminal, J5 has to be opened to disconnect the Test function and enable the Hold function. If both hold and test functions need to be accessed, a Push-On Screw Terminal can be used. Pins 6, 7, F & H - Signal High Input: Signal high input for the meter. Full-scale ranges of 2V, 20V or 200V can be selected on the Range Select Header.

Pins 8, 9, J & K - Signal Low Input: Signal low input of the A/D Converter.

Pins 11 & M - AC1 - Live AC Power Input:

Pins 12 & N - AC2 - 110/220V AC Power Select: Pins 13 & P - AC3 - 110/220V AC Power Select: Pins 14 & R - AC4 - Neutral AC Power Input:

Signal Conditioning Components

INPUT RANGE Header

Range values are marked on the PCB. Three positions are provided. After selecting a new range with the single jumper clip, recalibration is required.

占 SPAN Potentiometer (Pot)

The 15 turn SPAN pot is always on the right side (as viewed from the front of the meter). Typical adjustment is 20% of the input signal range.

SPAN ADJUST Header

This unique five-position header expands the adjustment range of the SPAN pot into five equal 20% steps, across 100% of the input Signal Span. Any input Signal Span can then be precisely scaled down to provide any required Digital Display span from ±19999 (40000 counts) to 0001 (one count).

Increase Span Decrease

SPAN Adjust						
Header position	1	2	3	4	5	
SPAN Pot %	20%	20%	20%	20%	20%	
Signal Span %	20%	40%	60%	80%	100%	
Equivalent Circuit Input LO (Acts like		Megaoh	m Potenti	ometer	Inpu

と ZERO Potentiometer (Pot)

ZERO

The Optional ZERO pot when installed is to the left of the SPAN pot (as viewed from the front of the meter). Typically it enables the displayed reading to be offset ±1000 counts.

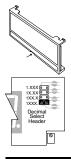

Calibration Procedure

- Select the required full scale voltage range by repositioning the 1. jumper clip on the Range Select Header. A range of 2V, 20V or 200V full scale may be selected.
- 2. Select the required span adjust setting (% of display range) by repositioning the jumper clip on the Span Adjust Header.
- 3 Apply an input of 0 volts. The meter will autozero and display 0000. If the zero needs to be offset use the optional Zero Offset pot.
- 4. Apply a known high input signal that is within the full scale voltage range selected.
- Adjust the Span Pot until the meter displays the required reading for 5 the signal being applied.
- The UM-45 is now calibrated and ready for use. 6. (Whenever a new range is selected, re-calibration is required to meet the specified accuracy).

See below for

connections

Decimal Point Selection

Remove faceplate by inserting a screwdriver blade in the slot at the bottom center of the faceplate. Press blade in to release catch and gently pry face plate outward from the bottom. (see also Case Dimension drawing)

Decimal selection is made on the front of the display board by moving the jumper clip to the desired position on the header.

TB-Kit Screw Connectors

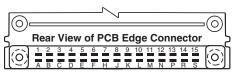

Six Screw Terminals included Free with each UM Series meter

A TB-KIT consists of 3 insulated Quick Connects and 3 of Texmate's patented individual screw terminal blocks which attach directly to PCB inputs. These provide a Quick Connect tab and screw clamp termination. When using the TB-KIT screw terminal blocks, it is possible to

select between 120V AC and 240V AC power, the optional low voltage switching power supply or the 24V AC power supply by connecting the screw terminals as shown in the diagrams below.

Optional PCB Edge Connector

A standard 30 pin edge connector (two rows of 15 pins on 0.156" centers) may also be used to connect the UM-Series. Order part no. CN-L15. For different power supply voltage connection details, see pin connections below.

Push-On Screw Terminals

They provide the greatest convenience and ease of use

Texmate's exclusive optional Push-On Connectors combine an edge card connector and a 10 position screw terminal block. Push-On Connectors are ordered preconfigured for each specific power supply voltage and each optional power supply available for the UM-Series.

Connector can be securely attached to case with screws	Pinouts are marked on Connector

Pinout Change-Over C	Connectors

To replace DPMs in existing panels where matching pinouts are required, Texmate can provide custom pinout Change-over Connectors, either with PCB gold finger terminations, (shown below) or customized versions of Push-On Screw Terminals. (shown above)

Change-over Connector shown is for Analogic models AN25M02,AN25M03, AN25M04 and AN25M05.

To customize the face plate, each UM-meter is supplied with a white printed clear adhesive label containing various popular descriptors. Choose the descriptor, peel off the adhesive backing and align the descriptor in the lower right corner of the standard face plate.

Custom Face Plates

Texmate Produces Thousands of Custom OEM Face Plates

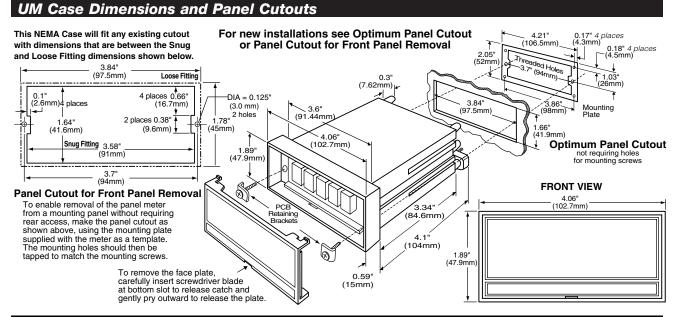

Have Texmate Design and produce a Custom Face Plate for your next project!

 Custom face plates have a nonrecurring artwork charge. A serial number is then assigned to each artwork to facilitate reordering.

• Small Run or One-Off custom face plates incur an installation charge, and are generally printed on a special plastic film, which is then laminated to custom faceplate blanks as required.

• Large Run (250 pieces min): custom face plates are production silk screened, issued a part number, and held in stock for free installation as required by customer orders.

• OEMs may also order Custom Meter Labels, Box Labels, Custom Data Sheets and Instruction Manuals.

SPECIAL OPTIONS (Specify Inputs or Outputs & Req. Reading) as shown in **BOLD** type

Texmate warrants that its products are free from defects in material and workmanship under

normal use and service for a period of one year from date of shipment. Texmate's obligations

under this warranty are limited to replacement or repair, at its option, at its factory, of any of the

products which shall, within the applicable period after shipment, be returned to Texmate's facil-

ity, transportation charges pre-paid, and which are, after examination, disclosed to the satis-faction of Texmate to be thus defective. The warranty shall not apply to any equipment which

shall have been repaired or altered, except by Texmate, or which shall have been subjected to

misuse, negligence, or accident. In no case shall Texmate's liability exceed the original pur-

chase price. The aforementioned provisions do not extend the original warranty period of any
